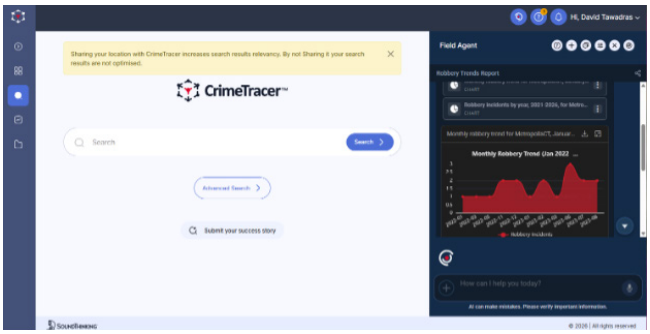
CrimeTracer™

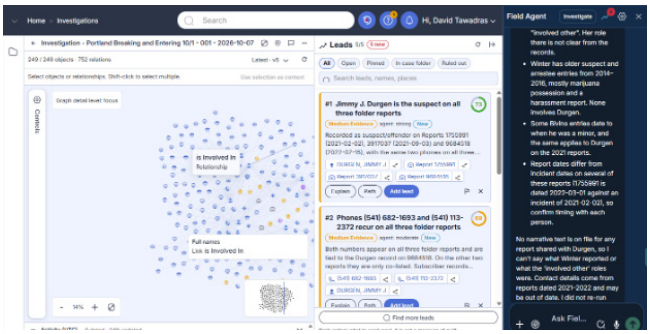
Unleash the Power of Field Agent in CrimeTracer

Investigate, Analyze, Find Leads, and Close Cases Faster

Field Agent



Deep Case Analysis



AI Assistant for Faster Leads and Operational Answers

- **Field awareness:** The Patrol Dashboard and Field Agent put recent crimes, BOLOs, active leads, and an AI summary of overnight activity in one place for officers.
- **Citywide view:** The Trends Dashboard gives command staff and analysts crime counts, trends, and hotspots.
- **Faster document review:** AI Summarization pulls key facts from lengthy reports and records.
- **Ask by voice or text:** Field Agent links people, vehicles, and locations across agencies to surface new leads.
- **Operational answers:** Request reports like “Build me a report on robberies over the last 30 days outlining key trends by area.”

Case Folders and Field Agent Streamline Investigations

- **Save Over 90% of Investigation Time:** Turn hours of manual record review into minutes, surface connections and leads your team may have missed, and free analysts from repetitive data sifting to focus on high-value investigative work.
- **Seamless Cross-Jurisdictional Collaboration:** Share case files securely with authorized partners to break down information silos between agencies.
- **Real-Time Case Alerts:** Get instant notifications when new records matching your case are added, so no lead goes cold.
- **Audit-Ready Documentation:** Maintain a clear, traceable record of case activity and findings to support prosecution and compliance.

About CrimeTracer

Public safety data keeps growing. It also stays locked in separate systems. Investigators spend hours searching each one while leads wait, and patterns that span agencies are easy to miss. The cost is real. Links that could identify suspects stay buried, arrests are delayed, and victims wait longer for justice. Critical details that keep officers safe take too long to find. CrimeTracer is a nationwide intelligence network that connects your CAD, RMS, and other internal systems with partner data and public records.

1+ billion

Contributed criminal data from over 2,500 agencies

THOMSON REUTERS

Integrated public data records through Thomson Reuters CLEAR

N-DEx

Integrated FBI N-DEx

Built to Work With Your Systems

CrimeTracer is accessible from any centrally managed device and across all compliant networks. It works with your existing infrastructure and natively with other SafetySmart® solutions, including ShotSpotter® and PlateRanger™, while connecting RMS, CAD, JMS, DEMS, and other data sources.

Privacy, Control, and Accountability

Your agency controls the data it shares and determines what the wider community of vetted law enforcement personnel can see. The Audit Log puts user activity into one central view. Every search and login is recorded. Administrators can confirm users follow established policies and use CrimeTracer responsibly.

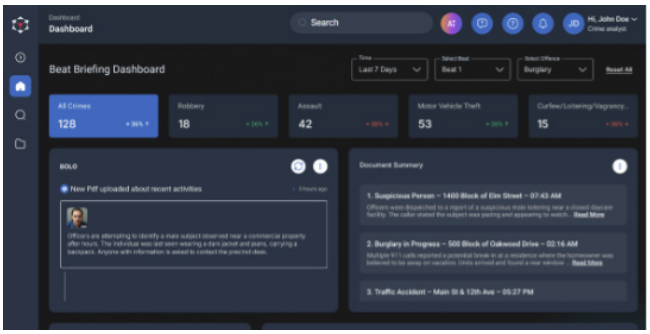
Benefits

- **Powerful cross-jurisdiction investigation**
- **Central search platform for all data**
- **Instant links between people, vehicles, firearms, etc.**
- **Consolidated views of involvements across jurisdictions**
- **CJIS compliant with audit log functionality**
- **Enhanced situational awareness**

Key Features

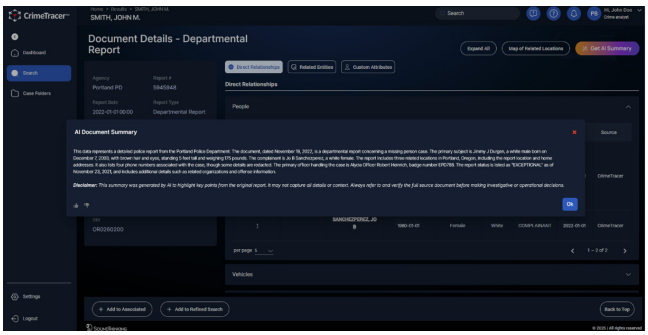
- **Field Agent**
- **Consolidated Entity Summary**
- **Case Folders**
- **Audit Log**
- **Deep Case Analysis**
- **Broad Search**
- **Patrol and Trends Dashboards**
- **Association-Based Search**
- **AI Document Summarization**

Patrol and Trends Dashboards



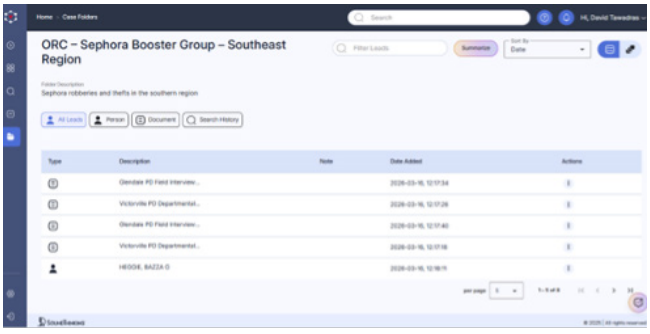
The Patrol Dashboard gives officers field awareness of recent crimes, BOLOs, leads, and overnight activity, while the Trends Dashboard gives command staff citywide crime counts, trends, and hotspots.

AI Document Summarization



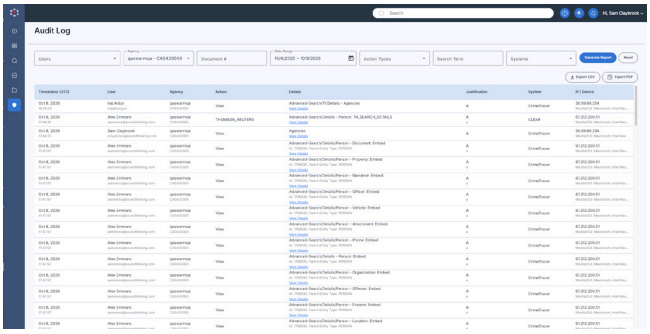
AI Summarization surfaces key facts from lengthy reports and records, providing at-a-glance summaries of leads, locations, and vehicles while reducing time spent on manual document review.

Case Folders



Case Folders keep leads in one place while investigators collaborate internally and across agencies. Alerts notify investigators of new records so leads surface without manual searching.

Audit Log



Every search and login is recorded. Administrators can confirm users follow established policies and use CrimeTracer responsibly.
